The supply side of legal productization .....	79
The demand side of legal productization .....	80
Getting tactical – what are the components? .....	81
The four arrows in your document automation quiver .....	82
The access to justice gap and how technology can help .....	84
<b>Chapter 7: Technology considerations in alternative dispute resolution .....</b>	<b>89</b>
<i>By Rich Lee, CEO and co-founder, New Era ADR</i>	
Background .....	89
Why ADR? .....	91
How can we improve existing dispute resolution systems? .....	92
Technology opportunities and the technology balancing act .....	93
ADR, tech, and access to justice .....	95
Making ADR make sense .....	96
<b>Chapter 8: Lessons from a legal tech start-up .....</b>	<b>99</b>
<i>By Daniel Farris, founder and CEO, NMBL Technologies</i>	
First, some history .....	100
Changing tides .....	101
New practices, new problems .....	102
Workflow reimaged .....	104
Understand user behavior .....	105
Do one or a few things well .....	106
Lawyers want it both ways .....	107
Last best experience .....	108
Play nice with others .....	109
Be careful with “artificial intelligence” .....	110
Selling legal tech is difficult and slow .....	112
<b>Chapter 9: Legal operations .....</b>	<b>115</b>
<i>By Tom Stephenson, vice president, Legal.io</i>	
Corporate legal operations’ functional competencies .....	116
Growth and innovation within the corporate legal operations profession .....	117
The modern era of corporate legal operations .....	129

<b>Chapter 10: Artificial Intelligence</b> .....	131
<i>By Joshua Walker, CEO, System.Legal</i>	
Basic principles .....	131
Legal AI fail clusters (negative archetypes) .....	133
Examples of legal AI fail clusters .....	134
Positive use cases .....	139
<b>Chapter 11: Blockchain and blockchain-enabled applications in law – a lawyer’s guide</b> .....	141
<i>By Olga V. Mack, vice president and CEO, Parley Pro</i>	
What is blockchain? .....	141
How does blockchain work? .....	142
Why use blockchain? .....	142
Blockchain-enabled applications .....	143
New opportunities for lawyers .....	154
<b>Part III: Broader issues in legal tech</b> .....	157
<b>Chapter 12: Technology and the legal profession – what’s legal ethics got to do with IT?</b> .....	159
<i>By Jan L. Jacobowitz, founder and owner, Legal Ethics Advisor</i>	
Historical context .....	159
Legal context for the use of technology and the legal ethics implications .....	160
Individual use .....	161
Outsourcing of legal services .....	166
Social networking, ethics, and technology .....	167
Conclusion .....	170
