

Table of contents

I. Introduction	7
II. Technical aspects and challenges	9
1. Separation and capture	9
1.1 Pre-combustion	9
1.2 Post-combustion	10
1.3 Oxy-fuel	11
1.4 Direct air capture	11
2. Transport	12
3. Storage	12
3.1 Storage environments	12
3.2 Storage capacities	14
3.3 Monitoring	14
4. Usage	15

III. Economical practicability	17
1. Economic costs	17
1.1 Capture costs	17
1.2 Transport and storage costs	18
1.3 Emissions trading: the EU ETS	21
1.4 Looking beyond current (first-in-kind) costs	23
2. Public funding and economic incentives	23
2.1 EU public funding	23
2.2 Other public funding/national incentives	25
3. CCUS project financing and bankability	26
4. CCUS risk profile and insurability	27
IV. Networks and initiatives	29
1. International level	29
2. European level	31
V. CCS projects and national strategies	35
1. Norway	35
1.1 Sleipner and Snøhvit projects	36
1.2 Northern Light Project	37
2. United Kingdom	37
2.1 Net Zero Teesside	38
2.2 Acorn Project	38
2.3 Caledonia Clean Energy Project	39
2.4 Zero Carbon Humber Project	39
3. Netherlands	39
3.1 Porthos Project	40
3.2 Athos Project	40

4. United States	40
4.1 Petra Nova	41
4.2 Illinois Industrial CCS Project	43
5. Canada	43
5.1 Boundary Dam CCS	43
5.2 Quest	43
VI. Sources of law	45
1. International law	45
1.1 London Protocol	46
1.2 OSPAR Convention	47
2. EU law	48
2.1 Carbon Storage Directive	48
2.2 Other EU law	51
3. National laws	51
VII. Regulatory framework	53
1. Storage	54
1.1 Siting	54
1.2 Construction and operation	56
1.3 Closure and operator's liability	59
2. Separation, capture and transport	64
VIII. Conclusion	65
Notes	68
